BIOGAS AMERICAS Tradeshow Breaks Attendance and Exhibitor Records Again

WASHINGTON, DC – May 7, 2025 – The American Biogas Council (ABC) today announced another record-breaking year for [BIOGAS AMERICAS 2025](#), held April 28–30 in Denver. For the fourth consecutive year, the conference and tradeshow shattered previous records and solidified its reputation as North America’s largest biogas and renewable natural gas (RNG) event.

This year’s tradeshow and conference welcomed **over 2,000 attendees**, featured **340 exhibits**, and showcased **250 companies** across **nearly 100,000 square feet** of exhibit space—a **30% increase compared to 2024**, demonstrating both the momentum of the biogas industry and the growing importance of BIOGAS AMERICAS as the market’s flagship event.

Biogas from organic waste can power and heat homes, fuel vehicles, or generate electricity, and organic fertilizer is a byproduct of biogas production which helps support soil health.

“Every year, the enthusiasm, innovation, and investment around biogas and RNG grows – and this year’s conference in Denver showed that it like never before,” said ABC Executive Director Patrick Serfass. “BIOGAS AMERICAS is where innovation meets purpose – leading us toward a more sustainable future powered by reliable, renewable energy produced from organic waste material.”

From project developers and operators to policymakers, financiers, and technology providers, BIOGAS AMERICAS continues to be the must-attend event for anyone in or near the biogas industry. Sessions covered the latest in project development, policy updates, carbon markets, and technology trends, all aimed at driving growth and delivering climate benefits.

ABC’s next conference is [BUSINESS OF BIOGAS](#), will be Oct. 21-23, 2025, in St. Louis.

Looking ahead to [BIOGAS AMERICAS 2026](#), which will be in Detroit, May 18-21, 2026, the momentum is already building: **over 50% of the 2026 tradeshow floor is already sold**, with even more space planned to accommodate demand.

###

About the American Biogas Council

The American Biogas Council is the voice of the U.S. biogas industry dedicated to maximizing carbon reduction and economic growth using biogas systems. We represent more than 400 companies in all parts of the biogas supply chain who are leading the way to a better future by maximizing all the positive environmental and economic impacts biogas systems offer when they recycle organic material into renewable energy and soil products.
